Experience

Vocational

Since June 2021 — **Backend Software Engineer**, *East Side Games*, Vancouver, Canada
- Develop scalable and robust backend services **PHP (Symfony)** and **Python** to ingest and process substantial volumes of data from mobile games, third-party apps and data lakes.
- Design and implement **APIs** and ETL pipelines used by game teams.
- Create and maintain **SQL** databases to support high volume streaming data.
- Provision and maintain **AWS** infrastructure with **Terraform**.
- Create microservices with **Python** and **Java** to refine data, and create front-end dashboards to support analytics teams.
- Ensure high-quality architecture with **Datadog** monitoring, tests and documentation.

April 2020- April 2021 — **Full Stack Developer**, *Field Safe Solutions*, Calgary, Canada
- Digitized workflows using **PHP (Laravel)** and **Javascript (Vue.js, Node.js)** by creating user-friendly web portals for multinational companies.
- Developed a **Javascript (Node.js)** microservice that transformed HTML forms into printable PDFs.
- Implemented and maintained cloud services **(AWS)**.

Additional

July 2008- June 2018 — **Production Manager**, *Annihilatrix Productions*, Calgary, Canada
- Primary contact for all aspects of project management for music events up to 2000 people and continuously improved processes.
- Organized and facilitated tours for international musicians and provided immigration support.
- Managed five employees and delegated tasks for festivals, live events and conferences.
- Wrote and executed contracts, handled budgeting and talent buying.

Education

June 2020 — **Web Development**, *Southern Alberta Institute of Technology*, Calgary, Canada

April 2018 — **Business Administration: Public Relations**, *Bow Valley College*, Calgary, Canada
